Proudly Saudi Arabian Company

Local Content Score – 53%

ADMINISTRATIVE CONTROL

Identify, assess and control financial, legal, strategic and security risks through Risk Management.

Contingency Plan to create actions and responses to events that might occur.

REGULATORY COMPLIANCE

Adhere to relevant laws, regulations, guidelines and specifications, including: Quality, Health, Safety and Security

GOVERNANCE

Safeguard the environment; create meaningful relationships with employers, suppliers, customers and communities; protect shareholders and stakeholders.

DIVERSITY & INCLUSION

Empower people by appreciating and respecting their differences, in terms of gender, ethnicity, religion, sexual orientation, disability, education, age, and national origin.

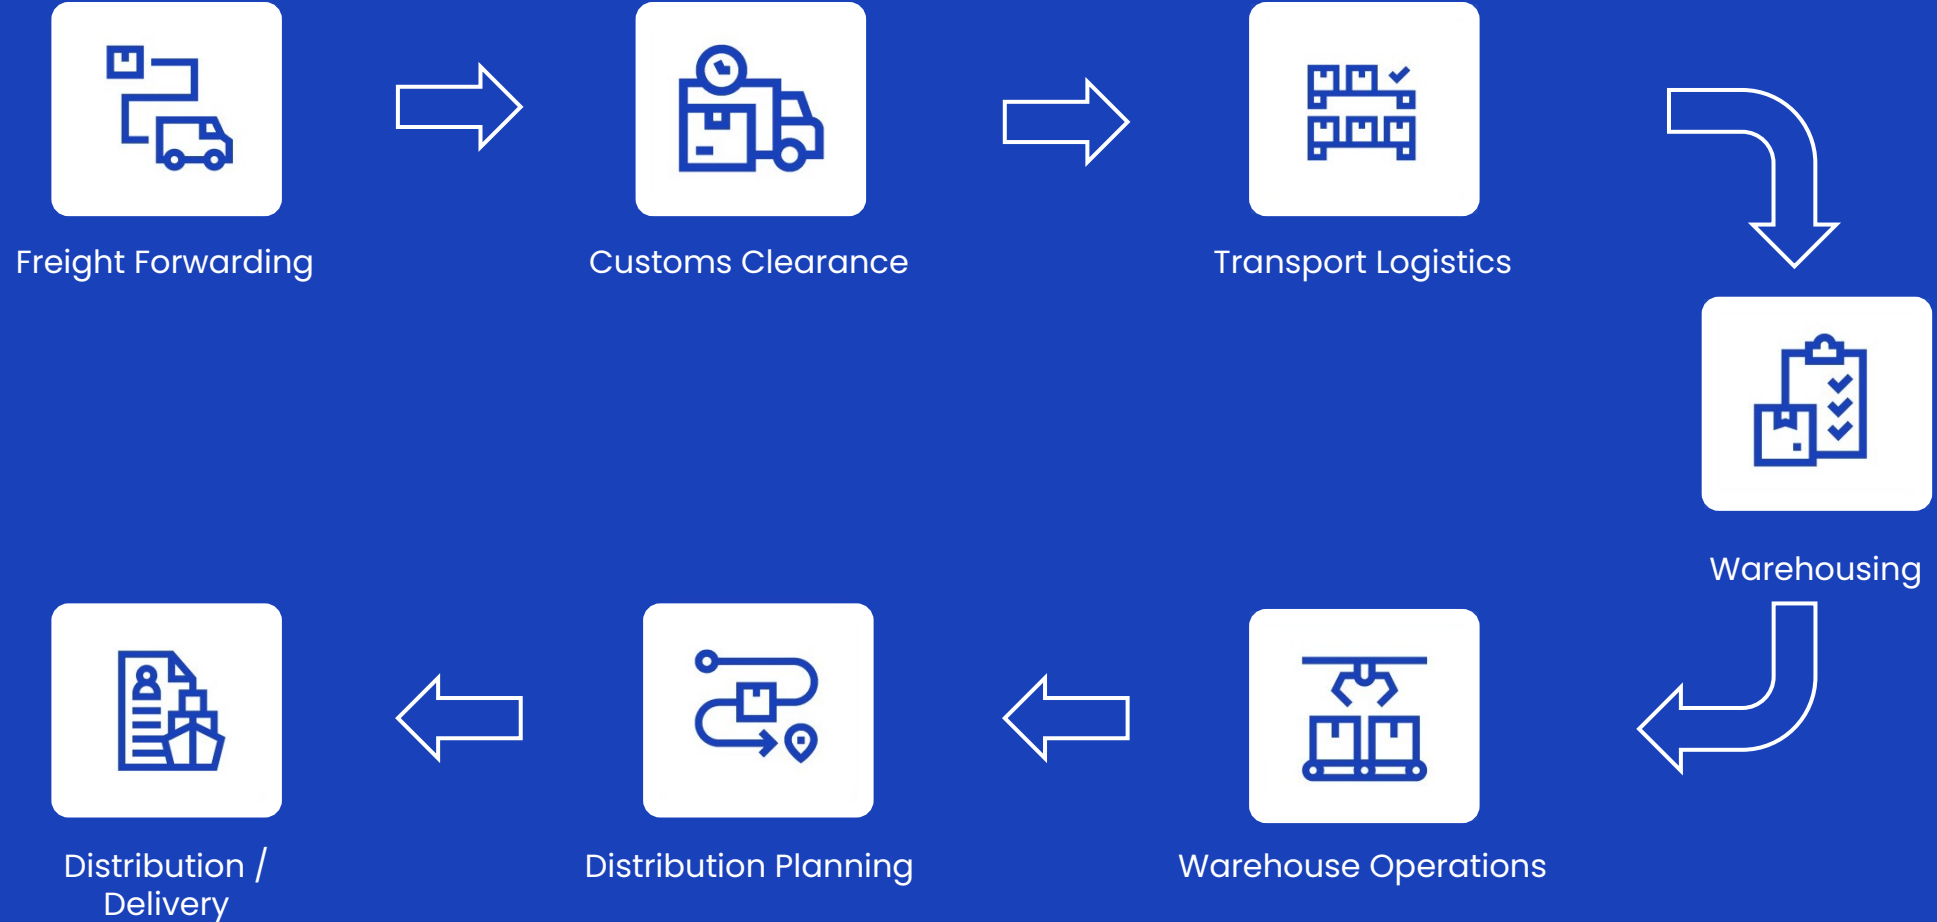

EQUITABLE BEHAVIOUR

Be courteous, polite and culturally appropriate at all times.

At the heart of our organization lies a belief in **strength in diversity**—that our varied perspectives and backgrounds are the foundation of our resilience and creativity. United in purpose, we move **together as one**, embracing challenges with a spirit of collaboration and shared ambition. We are defined by our actions, **we are what we do**, striving every day to live out our commitments and make a lasting impact.

Guided by a vision to **think big, win quietly**, we aim for greatness, letting our achievements speak for themselves while honoring humility. Our path is unwavering, rooted in **uncompromising morals** that keep us steady in every decision. This is our **wholeness**—a collective strength and integrity that drives us forward, always true to who we are and what we stand for.

End-to-End Supply Chain Solutions

How we Deliver

Precision Warehousing and Logistics: Tailored Solutions That Amplify Your Competitive Edge

01

Saudi Arabian Expertise:
Leveraging in-depth knowledge of the Saudi Arabian market, regulations, and infrastructure to ensure seamless operations tailored to the local business environment.

02

Customer Intimate Solutions:
Designing warehousing and logistics strategies that align directly with your company's unique competitive differentiators and market requirements.

03

24/7 Availability:
Providing round-the-clock services to keep your supply chain running efficiently, ensuring real-time responsiveness to business demands.

04

National Reach:
Delivering comprehensive coverage across Saudi Arabia with strategically located warehouses and an integrated logistics network for seamless distribution.

05

Flexible Operations:
Offering scalable and adaptable solutions that evolve with your business needs, including seasonal adjustments and fluctuating demand.

06

Compliance Assured:
Ensuring full adherence to Saudi regulations, including customs, safety, and environmental standards, to maintain operational integrity and avoid disruptions.

Warehousing & Technology

"Ensure that your supply chain isn't just operationally sound but a key driver of your competitive edge."

"Our Warehouse Management System transforms traditional warehousing into a strategic advantage by optimizing efficiency, scalability, and compliance."

Platform Compatibility: LFS operates seamlessly across various platforms, including Windows, Linux, and IBM iSeries (AS/400, i5), as well as on Android and iOS for mobile applications. It supports leading databases like Oracle, MS SQL, and DB2, ensuring broad integration capabilities.

ERP Integration: The system offers communication interfaces to all common ERP and PPS systems, facilitating smooth data exchange and process synchronization.

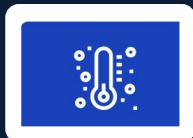

Industry-Specific Adaptability: The system provides tailored modules for various industries, including automotive, chemical, electronics, e-commerce, manufacturing, food and beverage,, and textiles, ensuring that specific industry requirements are met effectively.

System Reporting: LFS is designed to handle complex logistics operations, supporting multiple reporting and business intelligence requirements: -

- Warehouse occupancy
- Picking performance
- Order Monitoring
- Inventory turnover rates
- Inventory tracking
- ABC analysis
- Stock discrepancy reports
- Batch monitoring
- Expiry date control
- Cycle time analysis

Land Freight

In the modern landscape of land transport, the competitive edge no longer lies in owning fleets or infrastructure—those assets have become a dime a dozen.

The true differentiator is data.

Our Transportation Management System (TMS), in partnership with Omnialog, integrates with Microsoft Dynamics 365 and our WMS system.

With this integration, businesses can seamlessly manage transportation, inventory in motion and in postponement, together with warehouse operations in a single platform. This powerful combination improves:

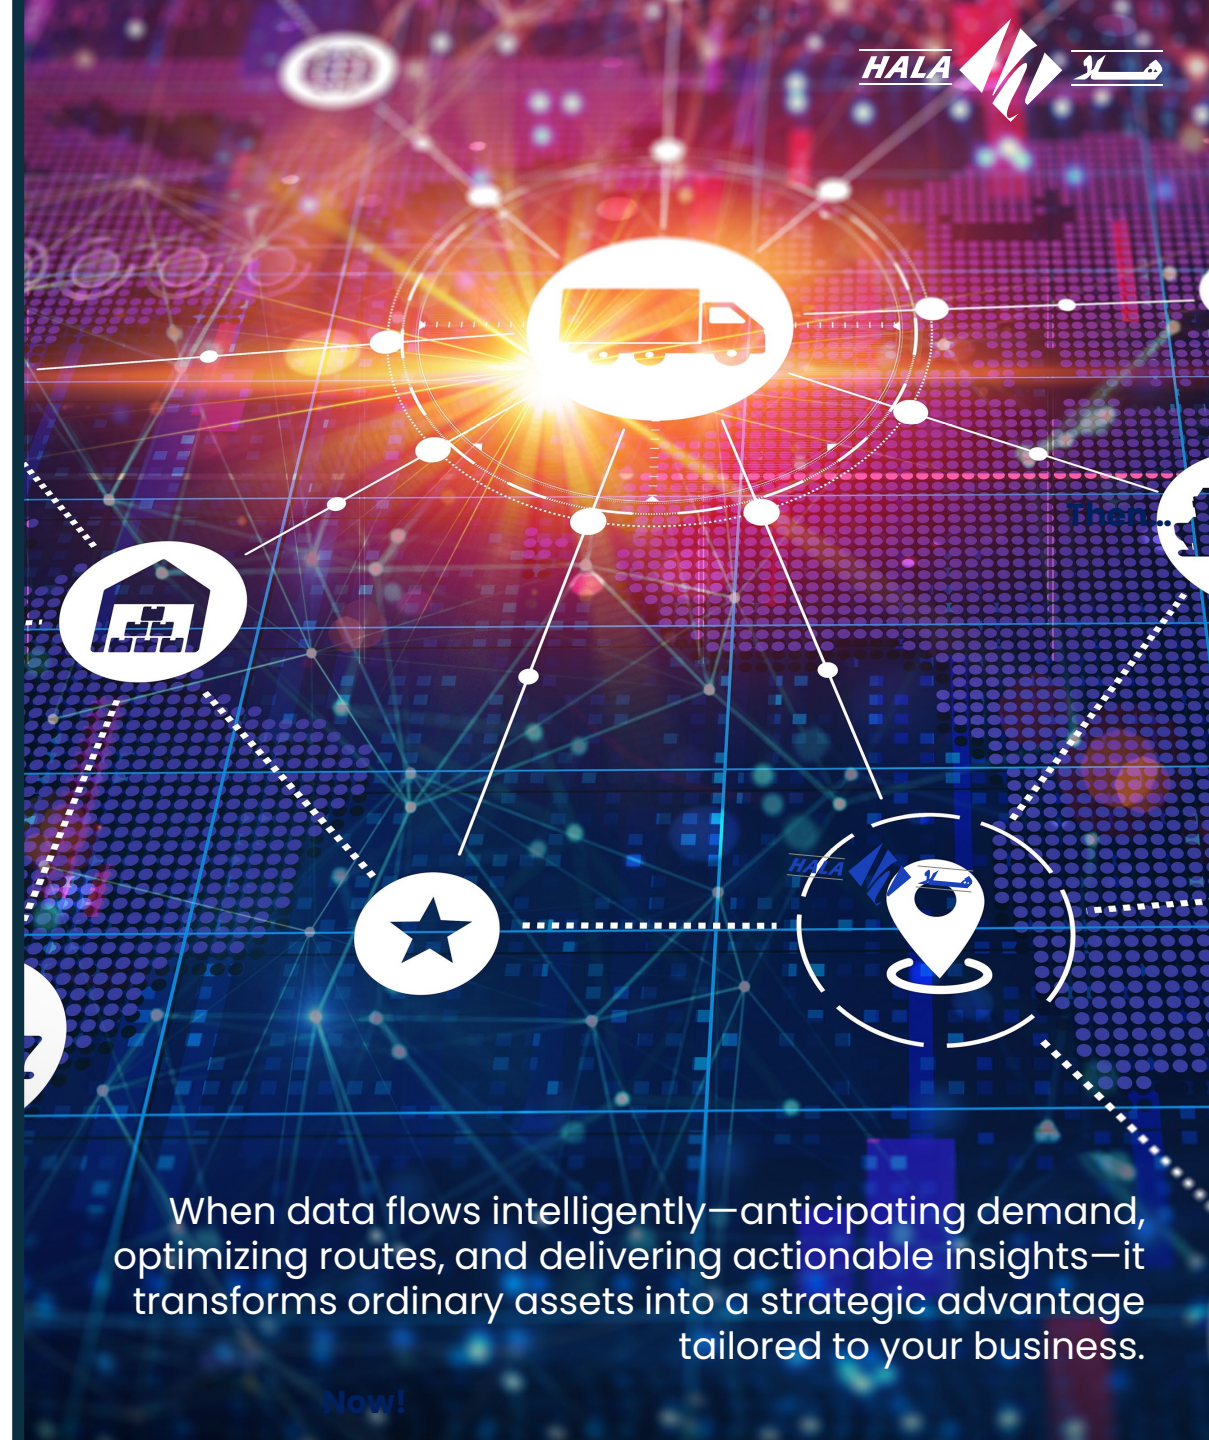

- Efficiency;
- Visibility, and
- Collaboration.

The power of integrated systems

By connecting different aspects of the logistics process, businesses gain a comprehensive view of their operations. This allows for better coordination, efficiency, and real-time decision-making.

TMS: Streamlining Transportation

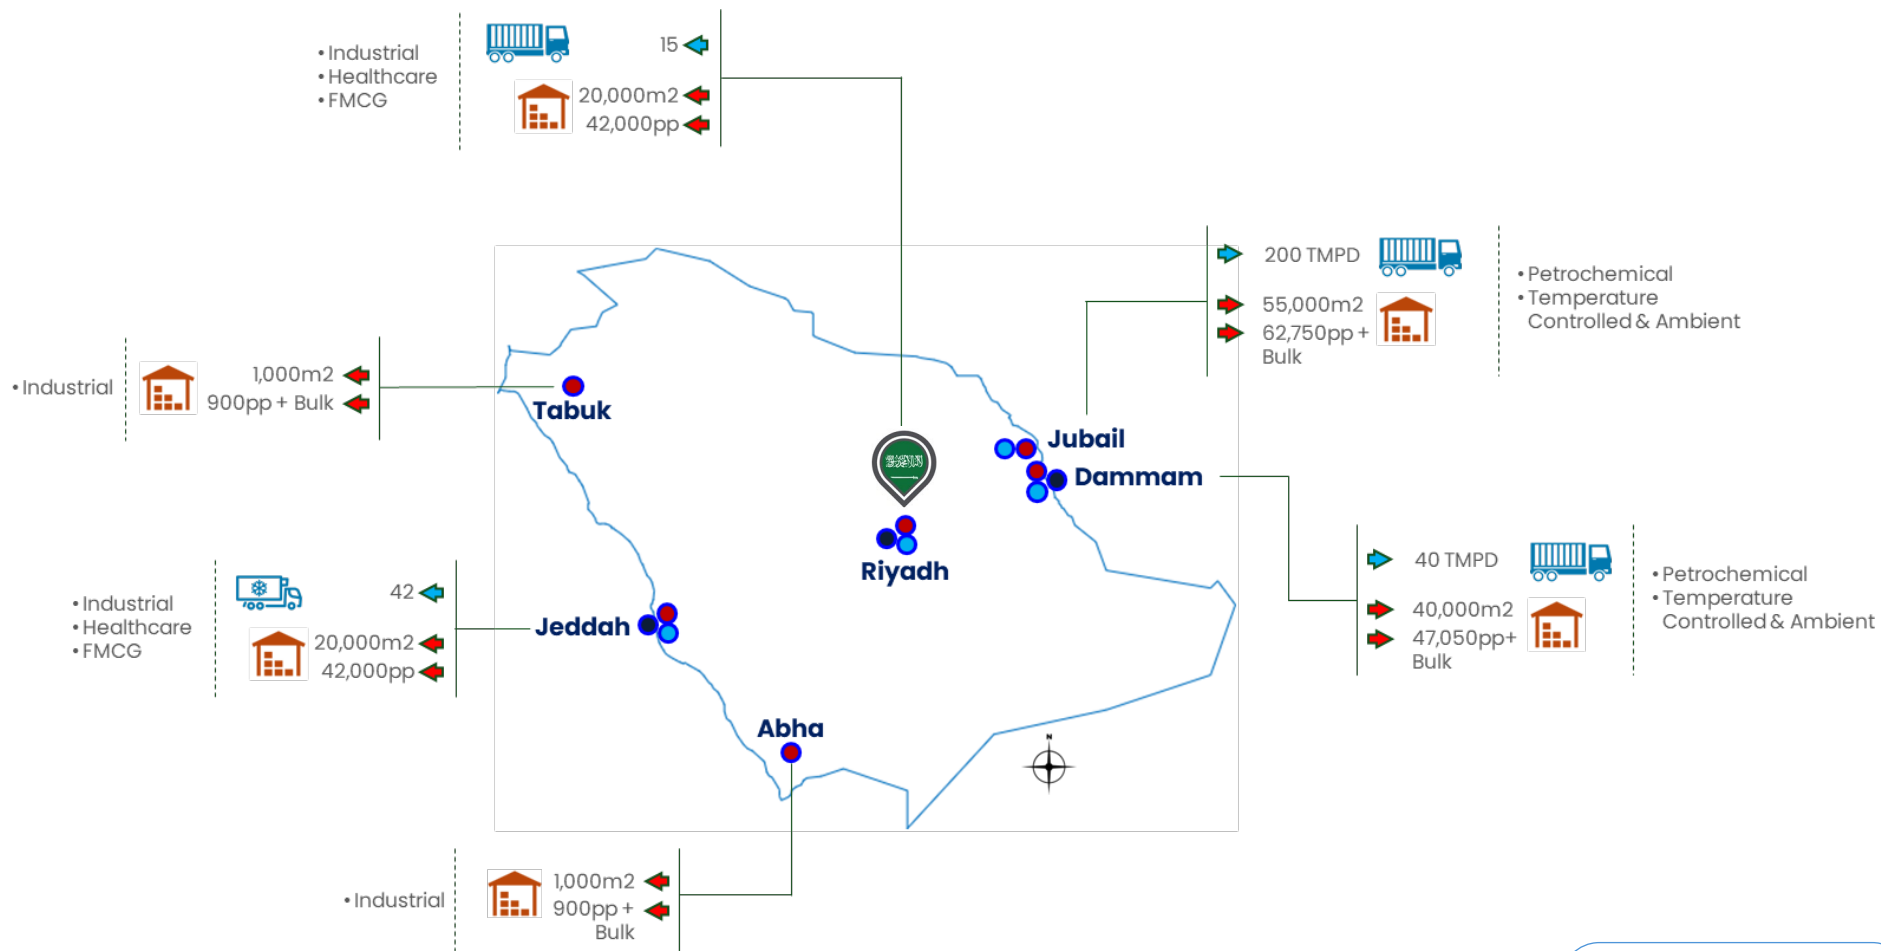

- Route Optimization
- Fleet Management
- Real-Time Tracking
- Load Planning
- Automated Documentation

When data flows intelligently—anticipating demand, optimizing routes, and delivering actionable insights—it transforms ordinary assets into a strategic advantage tailored to your business.

Licensing & Compliance

We hold ourselves to the highest standards of **compliance** across all facets of our operations—ensuring that our commitment to **licensing, health, safety, security, environmental stewardship, and quality** remains unwavering.

These principles are not just checkboxes for us; they are the foundation of our work and a reflection of our integrity. We believe that a compliant and responsible approach strengthens our collective success and aligns with our DNA and values”.

Industry Focus

Hala SCS is dedicated to empowering its customers to **compete and grow** by focusing on core competence industries where our strengths can make the most impact. Through our specialized **3PL services**, we deliver tailored solutions that add measurable value in every step of the logistics process. We prioritize key areas such as **inventory management**, which ensures optimal stock levels; **supplier hubs**, which streamline supplier collaboration; and **technology integration** that seamlessly connects all components of the supply chain.
