1. Executive Summary

Hala Supply Chain Services (Hala SCS) purpose of this project is to facilitate accurate stock counting, safe transportation, and secure storage of one restaurant tools, furniture, and kitchen equipment currently located at KAFD. This includes verifying the existing inventory through a comprehensive physical count, ensuring the safe handling and transfer of all items to the storage facility, and providing adequate warehouse space for their organized and protected storage.

Hala's solution addresses the full scope of KAFD's requirements for:

- **Stock Count Services**
- **Transportation Services**
- **Storage Services**

2. Hala SCS Value Proposition

2.1. Centralized Warehouse Control:

Hala offers a **dedicated or shared, consolidated logistics facility within Riyadh** that centralizes all KAFD materials — from construction and maintenance stock to tenant deliveries and high-value equipment — under one roof. This hub includes **integrated office space for KAFD personnel**, ensuring real-time coordination and operational oversight.

2.2. Strategic Workforce Integration:

Staff trained in **warehouse operations, DG handling, and transport compliance**. Escalation hierarchy and dedicated office space for up to 6 KAFD representatives ensure streamlined coordination.

2.3. Safety, Compliance & Specialized Handling:

Hala operates **licensed, regulation-compliant facilities**, equipped to safely store and manage **dangerous goods, temperature-sensitive chemicals, fragile items, and high-value inventory**. Our compliance architecture includes fire suppression systems, climate control, material classification zones, and safety-trained staff.

2.4. Scalable, Flexible Service Model:

We offer a **scalable model designed for KAFD's long-term growth**, with the ability to expand both storage capacity and fleet size in response to project velocity, seasonal peaks, or event-based surges. Our operating model supports both **dedicated and shared-space options**, giving KAFD strategic control and financial flexibility.

2.5. Technology-Integrated Delivery:

All services are delivered via a **tech-driven logistics architecture** — including API-enabled

WMS/LMS, real-time dashboards, RFID/barcode tracking, and automated KPI reporting. This ensures **end-to-end visibility, rapid response capability, and transparent performance management.** / [Subject to System Integration Project Completion.](#)

3. Proposed Solution Description:

Hala SCS proposes a complete 3PL execution model based on direct alignment with KAFD's Scope of Work:

- **Stock Count Services**
 - Conduct a comprehensive physical count and verification of all inventory items located at KAFD.
 - Record the description, quantity, and condition of each item.
 - Prepare and submit a detailed inventory report, including photographic evidence of all items.
 - Securely wrap and protect all materials prior to transportation from KAFD.
- **Transportation Services**
 - Provide appropriately sized trucks with a minimum capacity of ten (10) MT for the transfer of materials from KAFD to the Vendor's designated storage facility.
 - Perform safe loading and unloading operations at both KAFD and the storage facility.
 - Ensure that all transportation activities are conducted in compliance with applicable safety regulations and handling procedures.
- **Storage Services**
 - Provide a secure, dry warehouse storage area with a minimum size of two hundred (200) square meters, to be leased for a mandatory period of three (3) months, with the option to renew for additional periods as required.
 - Maintain the storage facility in a clean, organized, and safe condition suitable for the nature of the stored materials.

4. Compliance & Certifications

- **Compliance:** The facility is licensed by the Civil Defence, and the municipality has confirmed our compliance with the established regulations.
- **Fire & Safety Systems:** Full compliance with NFPA standards
- **ISO 9001** (Quality Management System)
- **ISO 45001** (Occupational Health and Safety Management Systems)
- **Inventory Management System Requirements**
- **CCC** (Compliance Cyber Security Certificate)
- **SFDA**-compliant for regulated inventory
- **Inventory Management:** FIFO methodology, real-time tracking.

5. Hala SCS Track Record

- **Tahakom:** Proven Track Record with Tahakom (**Saudi Technology and Security Comprehensive Control Co.**)

For over three years, Hala Supply Chain Services (Hala SCS) has maintained a trusted, nationwide partnership with Tahakom, supporting their logistics and warehousing operations across the Kingdom of Saudi Arabia. Our scope has included the management of secure storage, time-critical distribution, and inventory control for advanced technology equipment and sensitive infrastructure components.

- **Key highlights of our collaboration include:**

- **Nationwide Coverage:** Seamless logistics support to Tahakom facilities and sites across multiple regions.
- **Secure Handling:** Specialized storage protocols and trained staff for high-security, high-value assets.
- **On-Time Delivery Performance:** Consistently maintained an OTIF (On-Time In-Full) rate exceeding 98%.
- **Compliance & Visibility:** Full traceability through our WMS system with tailored reporting aligned to Tahakom's internal KPIs.

This sustained performance reflects Hala SCS's ability to serve high-profile, security-sensitive entities with reliability, precision, and confidentiality.

- **SACO:** Track Record with SACO

Hala has proudly supported SACO, one of Saudi Arabia's leading retail chains, with nationwide logistics and warehousing solutions for over 6 months. Our collaboration spans across multiple touchpoints in their supply chain, from centralized distribution to last-mile retail fulfilment.

- **Key highlights of our partnership include:**

- **Retail-Focused Logistics:** Tailored storage and dispatch solutions aligned with SACO's high SKU volumes and seasonal demand patterns.
- **Nationwide Distribution:** Reliable fulfilment to over 30 SACO branches across the Kingdom.

- **High Service Levels:** Maintained over 98% OTIF (On-Time In-Full) performance for store replenishment.

This long-term engagement reflects Hala SCS's capability to deliver scalable, retail-aligned logistics performance in support of fast-moving consumer operations.

Local Content

Hala SCS has achieved a local content scope of **55.22%** for the financial year 2023.

6. Riyadh Warehouse Requirements:

No	Requirement	STRATEGIC RESPONSE	Checked and Confirmed
1	Warehouse Ops	Propose dual models : a dedicated facility & shared warehouse in Riyadh. Demonstrate capability to offer secure, expandable space with climate control and archiving.	✓
2	Material Movement	Show a fleet plan that includes branded, height-compliant, GPS-enabled vehicles and the ability to scale , backed by manpower, training, and branding alignment.	✓
3	Systems Integration	Commit to a WMS/LMS system with real-time dashboards, full API connectivity, and barcoding. Show roadmap for customization to KAFD workflows.	✓
4	Workforce	Showcase a specialist-trained team : warehouse managers, material handlers, and tech support. Emphasize training programs and KAFD-compliant uniforms.	✓
5	Reporting & Governance	Propose a robust reporting cadence : weekly KPIs, incident management, escalation protocols, with a single accountable POC.	✓

7. Fulfilment of Requirements:

No	KAFD Requirement	Hala SCS Strategic Response	Compliance Status
1.	Warehouse within 60KM of KAFD	Two models proposed: (a) Dedicated facility, (b) Shared warehouse with secure segregated zones	✓
2.	Minimum 5,000 sqm warehouse	Existing facility exceeds 5,000 sqm, expandable up to 15,000 sqm as needed – Space is subjected to availability	✓
3.	Office space for 5–6 KAFD personnel onsite	Fully equipped office space available with connectivity, utilities, and access controls	✓
4.	Secure & compliant storage (incl. DG, temperature-sensitive items)	Climate-controlled zones, DG-compliant storage areas, and high-value item segregation	✓
5.	Material movement using branded, GPS-enabled fleet	Fleet of: 4 vehicles, all GPS-enabled and compliant with 2m height restriction; scalable on demand	✓
6.	Provision of cross-docking and reverse logistics	Cross-docking points at KAFD integrated with warehouse dispatch flow; reverse logistics fully embedded	✓
7.	WMS/LMS integration with KAFD ERP	API-enabled WMS and LMS with live dashboards, real-time data capture, and ERP handshake	✓
8.	Specialized workforce	Dedicated team of trained personnel across warehouse, fleet, and system ops; uniforms and ID compliance	✓
9.	Reporting and incident management	Full reporting matrix: weekly dashboards, KPI reports, incident tracking, escalation matrix with SPOC	✓

10.	Scalability across warehouse and fleet	Infrastructure and manpower scalability roadmap provided based on KAFD growth stages	✓
-----	--	--	---

8. Scope of Work & Add-On Value – Execution and Enhancement

No	Scope Area	Hala SCS Delivery Plan	Add-On Value (Differentiators)	Compliance Status
1.	Warehouse Operations	Operate 3,000+ sqm bulk storage and 2,000sqm racking facility, with temp-controlled zones, and secure archiving	Pre-configured areas for surge storage, VIP event staging, and tenant-specific allocation	✓
2.	Fleet Management & Movement	GPS-monitored, height-compliant fleet with KAFD branding; flexible capacity scheduling	Real-time tracking dashboard for KAFD stakeholders + branded uniformed drivers	✓
3.	Cross-Docking & Reverse Logistics	5 cross-dock points + reverse logistics for returns/spare parts across all parcels	Dynamic routing for cross-dock optimization + auto-flagged replenishment alerts	✓
4.	System Integration & Visibility	Full WMS & LMS with API integration into KAFD ERP; real-time inventory control	Operational Digital Twin for inventory visualization + live KPI portal access	✓
5.	Personnel & Workforce	Trained teams for warehouse, transport, and IT support; escalation matrix and contact hierarchy	Multi-language SOPs + rapid-response concierge team for tenant requests	✓
6.	Reporting & Governance	Weekly inventory and performance reports, monthly SLA scorecards, and incident logs	SLA-linked penalty/reward model to assure service commitment and accountability	✓

7.	Handover & Exit Plan	Structured exit protocols, asset and data handover documentation	Business Continuity Toolkit with optional transition training for incoming vendors	✓
----	---------------------------------	--	--	---

9. WMS and GPS Tracking Management:

No	WMS and GPS Tracking Management:	Checked and Confirmed
1	Hala will propose a warehouse management system that will keep and maintain records of all customer materials and will investigate a solution to integrate the proposed system with KAFD's system.	✓
2	Hala will investigate a way to either use/or integrate KAFD Tools Management System with SUPPLIER WMS system to maintain the stock of tools or assets or will propose its dedicated solution.	✓
3	Hala will be responsible for generating monthly Excel reports containing detailed information on the inventory. This report will encompass items, their bin locations, and the inventory status of items including but not limited to assets, consumables, and customer materials, along with calibration and recalibration dates. Additionally, the report will include records of inbound and outbound activities, identification of borrowed items, the borrower's information, and the scheduled return dates.	✓

HALA SCS Capabilities

WMS Systems:

- We utilize a robust WMS system integrated with a state-of-the-art Warehouse Management System (WMS). Our WMS supports advanced put-away and collection rules tailored to meet specific operational needs, ensuring efficient inventory management and streamlined workflows.
- The system is the EPG LFS (Logistics Fulfillment System). It is a comprehensive Warehouse Management System (WMS) that integrates with

various ERP systems to provide robust data management, real-time tracking, and advanced reporting capabilities.

- **Key values of the EPG LFS WMS system:**
 - Comprehensive Data Integration:
 - Flexible Connection Types:
 - Advanced Monitoring and Interface Settings:
 - Customizable Interface Tables:
 - User-Friendly Mapping Tool:
 - Real-Time Acknowledgements:
 - Excel and SQL Integration:
 - Cloud-Based Deployment:
 - Comprehensive Asset Management:
 - Enhanced Visibility and Reporting

Stock Count, transport and warehouse Storage area Proposal

Order Management Capabilities:

- Our order management system includes comprehensive searching tools with picture display for items during order placement. Additionally, it supports multiple layers of approvals, ensuring thorough oversight and control throughout the order process

10. IT Specifications:

No	IT Specifications:	Checked and Confirmed
1	HALA will furnish the subsequent IT specifications, including the requirements received from Siemens Energy, and incorporate the necessary specifications to guarantee the operational functionality of the warehouse:	✓
2	Network Infrastructure and connectivity.	✓
3	Warehouse Management System.	✓
4	Electronic Data Integration and the associated interfaces.	✓
5	The costs associated with the provision of these items, as well as the running costs, will be charged separately in the costing model.	✓
